## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, 17-26 and 34-62, drawn to apparatus, classified in class 606, subclass 151.
- II. Claims 12-16, 27-33 and 63-67 drawn to method of use, classified in class 128, subclass 898.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case, (2) the process can be practiced with another materially different product. For instance, the apparatus of claims 1-11 does not require a cutter, while the method of claims 12-16 does.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species for the process of use invention:

**Process of use:**

Species 1: claims 12-16

Species 2: claims 27-33

Species 3: claims 63-67

**Apparatus**

Group 1: anvil and clamp system

Species 1: figs 1-4

Species 2: figs. 5-6

Species 3: figs. 17-23

Species 4: figs. 24-27

Species 5: figs. 32-33

Group 2: anvil, cutter and staple holder

Species 1: fig. 34-38

Species 2: fig. 49

Species 3: fig. 115

Species 4: fig. 119

Species 5: fig. 125

Group 3: cutter

Species 1: fig. 37

Species 2: fig. 39

Species 3: fig. 40

Species 4: fig. 41

Species 5: fig. 42

Species 6: fig. 43

Group 4: sealer

Species 1: fig. 96

Species 2: fig. 98

Species 3: fig. 100

Species 4: fig. 102

Species 5: fig. 104

Species 6: fig. 105

Species 7: fig. 129

Group 5: clip

Species 1: fig. 108

Species 2: fig. 109

The species are independent or distinct because they require different steps, for instance, species 1 requires moving a cutter to incise a target vessel, not required by species 2.

Applicant is required under 35 U.S.C. 121 to further elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions

unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Natalie Pous whose telephone number is (571) 272-6140. The examiner can normally be reached on Monday-Friday 8:00am-5:30pm, off every 2nd Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anhtuan Nguyen can be reached on (571) 272-4963. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
